

ZIEH-PLUS Pull-Screws SPEZIAL 5.5 x 45 mm, contains 10 pieces

Order number: TH-03250

Pull-screws are especially produced for a maximum of stability, reliability and resistance against breaking under traction or sideways forces. The thread itself is also optimized for the purpose of pulling. In order to facilitate screw driving all pull-screws possess a Torx TX-20 head. A coloured marking shows if the screw is unneeded.
