

## Cordless Workplace Floodlight Solaris Maxi

**Order number:** TH-04005

The Solaris Pro is the addition to the well-known NightSearcher Solaris floodlight series. Ergonomic handle, extremely compact and light. Thanks to the telescopic rod and the lamp head, as well as the fold-out support feet, the Solaris Pro is safe and stable on any surface. The 16,000 lumens of light output ensure sufficient light at the point of use. Switchable from spot to flood light for maximum flexibility.

The intelligent control makes it possible to set the running time as required. The Solaris then automatically dims the light in order to achieve the desired remaining running time. At the lowest level, a maximum runtime of 48 hours can be achieved.

- sufficient lighting regardless of any power source
- light and compact
- four different brightness levels and flashing function
- powerful battery
- the telescopic pole can be extended to a height of 1.85 m

supplied with:

AC charger
