

Telescopic Tripod, max. 4.58 m high

Order number: TH-04125

The telescopic tripod with air cushioning reaches a height of over 4.75 m when extended, is extremely stable and, thanks to the anchor set, absolutely stable even at this height. Thanks to the high quality, a long service life is ensured. Thanks to the integrated air cushioning, an uncontrolled falling of the bars is effectively prevented.

The tripod fits into the standard bracket of most fire engines. The individually extendable feet easily compensate for uneven floors.

- standard spigot for mounting headlights and bridges according to DIN 14640
- feet individually height adjustable for level adjustment
- special stop for centering the legs for transport
- special clamping system for fixing the pipes

supplied with:
1 anchor set

max. height: 4.75 m
