

## Floodlight Aldebaran Raptor RP1000 LED

**Order number:** TH-04220

Efficiency redefined. The floodlights of the Raptor RP LED series belong to the most efficient of their type. The Seto Xpect lens system collects the produced LED light and produces the perfect illumination of the place of action via a multitude of specially calculated single lenses. The created beam characteristic is not only a recreation of a common halogen light, but it was optimised considerably. The result speaks for itself: A continuously steady illumination of the surrounding area.

An LED floodlight of the Raptor series consumes less than a sixth of the energy of comparable halogen floodlight at up to 40 % of higher light quantity at the same time.

supplied with:  
mast receiving

dimensions: approx. 340 x 272 x 130 mm  
power: 160 W  
luminous flux: approx. 14.353 lm  
illuminant: 2 x Xpect LED module  
life time: approx. 50.000 h  
weight: approx. 5.95 kg
