Suction hose and drain hose: 10 meters length each, ø 38 mm

Dimensions without handle bar: 46 x 49 x 64 cm

Dimensions with handle bar: 46 x 66 x 85 cm

Weight without accessories: 18 kg

In relation to its low weight and space-saving dimensions, the most compact vacuum cleaner in the HYDRA series has a powerful suction turbine and a powerful dirty water pump with a suction capacity of 8,000 l/h. Thanks to its detachable handle bar and low weight, the HYDRA-Boy is easy to

transport.

With a suction passage of 38 mm, the HYDRA-BOY easily copes with mud and smaller stones. Inside, the unit has a tear-resistant, easy-to-empty mesh bag that collects coarse solids sucked in, protecting the dirty water pump. Its long suction and discharge hoses provide a wide range of applications with plenty of room for maneuver. The extensive accessories with versatile application possibilities make the HYDRA-BOY a strong helper in an emergency.
