

Eccotarp Collecting Basin TANK 5000, size 2300 x 2300 x 1300 mm, content 5000 l

Order number: TH-07130

The basin with sturdy, dismountable metal frame is i.a. suitable for water extraction by helicopter with external water tank (Bambi Bucket). Thanks to its quick operational readiness, it is also ideal as a temporary storage tank for storing domestic water or pumping liquids.

The container is made of heavy-duty PES / PVC and can be used in the temperature range of -30 °C to +70 °C. The material is resistant to many chemical and petroleum products, which extends the possibilities of use even in environmental accidents. The container can be filled quickly using the C52 or B75 inlet tubing in the top of the frame (not included). In the lower part of the container, a pressure connector with cover is attached. If the container is not placed on even and smooth surfaces, we recommend using a tarpaulin under the bottom of the container.

- fast operational readiness
- low weight
- simple and stable frame construction
- low space requirement in packed condition
- tool-free installation in just a few minutes

supplied with:
1 underlay 2500 x 2500 mm

volume: 5000 l
diameter: 2300 mm
height: 1300 mm
number of legs / supports: 6/2
pack size frame: 300 x 200 x 1350 mm
pack size foil: 300 x 200 x 800 mm
weight: 50 kg
