

## Eccotarp Decontamination Basin complete set, size 2000 x 2000 x 200 mm, content 650 l

**Order number:** TH-07150

Foldable decon basin, specially developed for the requirements and needs of fire brigades, rescue services and civil protection units. In addition to decontaminating people and equipment, the tray can also be used to collect (dangerous) substances.

Thanks to the deformable construction, the basin can be used in a wide variety of locations. The size is optimized for decontamination of a person with arms outstretched.

The basin is self-supporting with side supports, made of PVC with a special surface coating (PES / PVC 680 g / m<sup>2</sup>). The material is resistant to chemicals, oil products and acids (see resistance list). Stiffeners are welded into the sides of the tubs to secure the shape. The side supports guarantee a firm footing. Side handles make alignment easier.

The basin is provided with a drain opening D25, which is provided with a cover and serves to drain the basin without a submersible pump. Thanks to this element, the tray can be used not only for decontamination, but also as a foldable collecting tray if required.

- optimized dimensions 2 × 2 × 0.2 m
- quick assembly in any terrain
- deformable construction
- side handles for easy handling
- firm stand by side supports
- D25 drain opening for easier pumping or draining of contaminated substances

supplied with:  
transport bag  
protective insert  
groundsheet
