

Eccotarp Decontamination Mat, rubber composite material, size 470 x 470 mm

Order number: TH-07156

Special floor mat for effective removal of hazardous substances when decontaminating people. It is made of a durable rubber compound based on recycled materials. The mats are primarily intended for use in the Eccotarp decontamination basins, but can also be used as cleaning mats for entering any decontamination area.

- long shelf life of the material
- high weight prevents the mats from sliding in the tub
- mats can be stacked compactly, which saves space in storage
- made from recycled material
- chemical-resistant and water-repellent coating
- abrasion resistant
- reliably discharges dangerous substances

material: rubber composite

dimensions: 470 x 470 x 80 mm

weight: 9.5 kg
