

Crib Block Set CB4

Order number: TH-08240

Cribbing blocks are used for stabilization of an object or to support in lifting objects during rescue operations. The unique interlocking system of the Crib Blocks allow for creating a variety in stabilization structures with ease.

The reversibility of the Crib Blocks can create a flat surface ideal for lifting purposes. Highest quality polyethylene with 60 tons of capacity, splinter free and no absorption of fluids.

Quickly stabilize and follow the load of an object during lifting or use it for quick stabilization during extrication. The Rapid Stair follows the load in stages of 10 mm offering controlled stabilization.
