

Hi-Lift First Responder Jack

Order number: TH-09000

From being first on-scene at a rural accident to deploying RIT for a firefighter down during a structure fire, or searching for victims at the largest of incidents, there is no tool in the fires service that offers more versatility than the First Responder Jack.

Firefighter-designed, the First Responder Jack is constructed of steel, cast iron, and high-strength aluminium, and available in 36", 48", and 60" sizes. It offers up to 2113 kg of leveraging, lifting, and winching options.

No other rescue tool is as easy to use, dependable, visible, and versatile - giving it unlimited potential at a fraction of the cost of other expensive rescue tools. The First Responder Jack offers the same spreading and ramming options used in extrication as the expensive hydraulic tools at a fraction of the cost. It requires no fuel or power, which makes it ideal for remote access with limited resources, and applications in all types of disasters.

- easy handling
- immediately ready for use
- extremely rugged
- protection against overcharge by shear pin
- works mechanical - no electricity or hydraulic system necessary
- low service costs
- persistent applications for a better visibility at night

min. lift height: 17 cm

rated load: 2113 kg

tested load: 3175 kg

tensile force: 2268 kg

compressive force: 2268 kg

powder-coated surface

sizes:

36" (91 cm), lift height 69 cm, weight 12,25 kg

48" (122 cm), lift height 98 cm, weight 13,7 kg

60" (152 cm), lift height 126 cm, weight 15,1 kg
