

PETZL PIXA 3R Headlamp, rechargeable, for close-range and long-range

Order number: TL-05080

The PIXA 3R headlamp is a rugged, rechargeable headlamp suitable for frequent use by professionals. It may be worn on the head, mounted on the helmet, or placed directly on the ground. The multi-beam adapts to all situations: close-range vision, movement, and long-range vision. **CONSTANT LIGHTING** technology: brightness does not gradually decrease as the batteries are drained.

- the integrated lithium-ion polymer battery, combined with a quick charging station (3 hours) is designed for frequent use.
- the luminous duration can be adjusted to adapt the luminous power to the user's requirements (short operation of the rotary switch):
 1. **STANDARD:** balanced ratio between luminous power and luminous duration.
 2. **MAX AUTONOMY:** maximum luminous period
 3. **MAX POWER:** maximum luminosity
- automatic switching to reserve mode when the battery is almost discharged
- ergonomic rotary switch, can be operated even with gloves on
- transport position protects the glass of the headlamp and prevents accidental switching on.
- can be used in explosive environments with occasional risk of explosion
- excellent drop (2 m), impact and pressure (80 kg) resistance
- comfortable, washable, elastic headband
- waterproof up to 1 m for 30 minutes (IP 67), no special care required after immersion
- resistant to chemical products

supplied with:

head band

adapter for mounting on a helmet without head band (such as HEROS-smart)

charger base

USB cable

plug

Specifications

lamp: LED

luminance: max. 90 lm

luminous range: max. 90 m

beam pattern: wide, mixed, focused

energy: rechargeable Lithium-Ion Polymer battery, 930 mAh

recharge time: 3 h

waterproof: IP67

weight: 145 g

CE, ATEX: Zone 2/22, ANSI/NEMA FL1
