

PARALUX PX1 Shorty THW Helmet lamp, 80 lumens, ATEX Zone 0

Order number: TL-08031

With the PARALUX PX1 SHORTY safety lamp, users from the most different trades always have a powerful, ultra-compact companion at hand and with its low weight of 114 g ensures a comfortable fit to wear on the helmet.

The power pack comes with a beam that carries up to 120 meters and features 5W Cree LED lamps (80 lumens) designed to deliver uninterrupted light for more than eight hours; in the low-power mode, the two AA batteries last for full 15 hours. A battery condition indicator has served well in practice and indicates the battery power in different colors (green=OK / red=only 25% remaining battery power). In addition, three short flashes display a warning signal every 30 seconds after 8.5 h burn time and indicate that the battery power is about to run out.

Thanks to its orange-peel reflector surface, the PARALUX PX1SHORTY produces an even light beam – and reduced glare significantly e.g. in smoke-filled rooms. The IP68 certified quality product also wows users in terms of ergonomics and durability and contains plenty of nice features such as an ergonomic rear switch, which can be quickly and easily operated even when wearing gloves, easy attachment to the PARASNAP helmet mounting system and a robust polycarbonate housing.

- 100 % watertight
- made of non-conductive plastic
- battery type: 2x AA/Mignon/each 1.5 V
- rubberized rear switch for one-hand operation
- rubberized lamp head
- **compatible with almost all helmet mounts and with our PARASNAP**
