

## Emergency Rescue Knife S-CUT QE, colour black, length 180 mm, weight 62 g

**Order number:** TO-02010

S-CUT QE is the cheap version in the S-CUT family. This model has an integral blade which is rotatable but not changeable. It can manage cutting even in thicker fabrics and materials. In emergency situations it is a fast way to remove the patient's clothes in order to expose injuries without needing to change the patient's position which could inflict further injury or unnecessary pain.

S-CUT replaces scissors, knives and similar tools. Ordinary fabrics as well as leather belts, zippers and heavy outerwear can be easily cut. All you need is a free edge of the clothes where you can start the cut. It is designed for optimal ergonomics and provides an excellent grip. Using scissors in heavy materials will most often require a lot of effort. The S-CUT is used with a pulling action requiring minimal effort.

- light weight
- easy to clean
- rotatable blade
- designed for optimal ergonomics
