

## Emergency Rescue Knife S-CUT 501 RTL

**Order number:** TO-02055

The optimized S-CUT 501 RTL has been enhanced with a blade rotation mechanism that allows for easier rotation during use. Especially for emergency first aid, it serves as a cutting tool to quickly remove the patient's clothing for life-saving measures. Protective clothing, leather, belts or zippers can also be cut with minimal effort. This means that the patient's position does not have to be changed, which may cause unnecessary pain. Simply attach to the hem and perform a pulling motion.

- Individual parts can be easily disassembled for cleaning or replacement
- ergonomic design
- handle offers optimal grip
- easy rotation of the blade
- with integrated bottle opener

material: stainless steel, aluminum and heat-resistant plastic
