

Pin Remover, for interior panelling in cars

Order number: TO-02400

Special tool for undoing the inner paneling of vehicles of any type. The specially designed tip engages beneath the clips that are used to attach the paneling. The clips can then be easily removed by means of the levering effect. Indispensable during rescue operations involving vehicle accidents.

- large, non-slip, dual-component moulded handle
- reliable grip, even with gloves
- blade made from sturdy CV steel

length: 21 cm

weight: 100 g
