

PARATECH TopCut Fire Axe, with fiberglass handle

Order number: TO-03160

The FireAXEss was especially developed for fire services. The axe is equipped with a 3 kg head made from hardened steel and a robust handle made from fiberglass. Caused to the special blade geometry this axe achieves more power with the same effort compared with a standard wooden axe. The head has a flat side for using as sledgehammer.

- higher impact energy with less effort
- special blade geometry
- robust handle made from fiberglass
- hardened steel for a long lifetime

length: 92,5 cm

weight: 5.1 kg
