

Ceiling Hook with Nupla Glass Fibre Handle, variable 1.22-2.44 m, with replaceable tool head

Order number: TO-03330

The telescopic handle with changing system offers the user maximum flexibility. The handle can be stowed to save space and can be deployed to the right length as needed.

Thanks to the additionally available, numerous tool heads, a whole range of tools can be stowed in the smallest space to be prepared for every case.

The safety is not too short in this system. Glass fiber reinforced plastic offers a high level of safety against electrical and thermal hazards. The telescope function works with a double security system. The stem can be locked with a quarter turn in any length (Twist-Lock). In addition, the stem is secured with the coupling ring.

- durable and robust
- double security thanks to twist lock and screw lock
- infinitely adjustable in length
- easy change of tool heads possible
- stem insulated against cold and electrical stress (not certified)
