

PETZL LASER ice screw

Order number: TO-04000

The LASER is a lightweight, efficient ice screw. The shape of the drill bit with its three teeth supports a fast grip in the ice. The steel shaft and the special thread make it a robust and solid ice screw.

- fast gripping in the ice
- the ergonomically shaped aluminum tab facilitates handling and allows the ice screw to be screwed in quickly.
- robust, solid construction: Steel shaft and special thread,
- use of tempered steel to reduce weight and increase strength.
- regrinding simplified by the grinding reserve of the teeth.

Material: steel, aluminum

Certification(s): CE EN 568, UKCA, UIAA 151
