

VLITEX Car Service Set Premium M, Top and bottom cover

Order number: VB-01041

The VLITEX Car Service Set is an easy-to-use and comparably inexpensive way to ensure safety during transport and storage of accident-damaged e-cars.

This is because a potentially damaged battery still poses an increased risk days after an accident.

Until now, crashed e-cars have been transported in flooded containers and finally stored at a great distance from other objects. But that's over now. All the dangers posed by a battery fire do not matter if the vehicle is safely packed in the set of fire blankets. (The VLITEX Car Service Set Premium is patent pending)

- leaking liquids are retained
- smoke development is considerably reduced
- can be used several times - depending on the fire load
- no maintenance required
- weatherproof, the material does not corrode
- temperature resistant up to 1,000°C (short-term up to more than 1,300°C)

material: base material: 560 g/m² high temperature glass fiber fabric with silicone coating on both sides, fire-repellent sewing thread, accesses with red silicone coating
dimensions: lower ceiling with metal eyelets 4 x 7 m, upper ceiling with straps 6 x 7 m
weight: lower ceiling 22 kg, upper ceiling 27 kg
