

## VLITEX battery safety box L, 8 separating pockets

**Order number:** VB-01047

Drones, thermal imaging cameras, countless devices - rechargeable batteries are constant companions in our everyday lives.

In the VLITEX battery safety box, they can be stored in different sizes thanks to the variable, heat-resistant inner walls, and at the same time, the partitions delay the spread of fire to other batteries. So you can gain time to bring the battery box into the open before the fire breaks out.

- Temperature resistant up to 1.000°C (short term)
- composition of five layers of material for highest stability and safety
- double security by velcro fasteners and buckle
- variable partition walls made of fiberglass fabric
- innovative cable grommet for good sealing
- increased safety during the loading process
- smoke and flames remain in the bag in case of fire
- stable transport handle

dimensions: 21,5 x 16 x 14,5 cm
