

CO Detector EI Electronics 208iW, 10-year battery

Order number: VB-02120

Fireplaces in Germany are maintained by specialized companies. Although the chimney sweeper regularly checks fireplaces and chimneys, poisoning accidents happen again and again.

A carbon monoxide detector provides security as it warns against harmful carbon monoxide concentrations.

- electrochemical sensor for measurement of carbon monoxide proportion in the air
- verification of carbon monoxide concentration in the environment
- alarm (85 dB(A))
- at a decreasing value the alert stops and resets itself automatically
- test/mute button
- memory function
- radio function
- end-of-life display

supplied with:
sealed lithium battery
mounting accessories

alarm volume: 85 dB(A)
power supply: lithium battery
battery lifetime: min. 10 years
operating temperature: 0 °C - +35 °C
dimensions: 120 x 105 x 45 mm
weight: 180 g
