

WRS water rescue shoe

Order number: WR-03015

Water rescue shoe with integrated fiberglass safety toe cap that provides rescuers with extra protection from rocks or rolling vehicles during water rescues.

The upper of the boot is made of neoprene that fits securely around the ankle with the world-leading BOA Fit System.

- Nitrile rubber sole for optimal grip on wet, slippery surfaces
- Multi-directional tread pattern for slippery terrain
- BOA Fit System for secure and fast tightening
- Kevlar fiber as protective midsole
- Cuff for protection against stones
- Holes for water drainage
- oil resistant sole
- bright color for better visibility under water
- reflective details on the strap

material: synthetic leather and neoprene

weight: 750 g per boot

EN ISO 20345:2011 S1P SRC
