

Dive Time Control Board Celle

Order number: WR-05000

The dive time control board Celle is for monitoring up to three divers at one dive. The real-time clock shows the current time. Three timers measure the real dive time. If a diver comes up during the dive, the time can be stopped and again started if he continues diving.

To document the times (calculation respiratory minute volume and dive time) a copyable form is enclosed.

Dive time control board Celle features:

- permanent marker with holder
- ring binder mechanism for dive time documentation (quadruple)
- three timers
- real-time clock
- mounting option for LED lamp
- mounting option for the shoulder strap

dimensions: 435 x 340 x 6 mm

weight: 0,630 kg
