

## **DOLPHIN - Universal Linear Rescue Collar, with flex mask and grab straps**

**Order number:** WR-80015

The universal life saving device is manufactured in expanded, self skinning, closed cell polyurethane.

It can be flexed to wrap around the casualty in horse shoe shape. Along with its flexible shape, the karabiner closure makes it adjustable to casualty of any build.

A one way mouth-to-mouth flex mask (model TA0905A) with hydrophobic filter, ISO connection and EVA box (included) is positioned in the purpose made cavity on one end, ready for immediate use once the casualty has been removed from the water.

The new shape and the grab straps applied to the device make it easier for both, the rescuer and the casualty, to grip. Elastic tapes built in the grab straps allow to carry swim fins (not included) with the rescue device.

Im Lieferumfang enthalten:

Color box Flex Mask, blue (Latex free)

material: self skinning expanded PU, tapes Polyester

dimensions: 120 x 170 x 80 cm

buoyancy: 110 N

weight: 2 kg
